

I+D

One of the **ABF's** main pillars is the continuous improvement of our products and processes, as well as the incorporation of new ones in the market. To achieve this goal, it's essential to invest resources to improve and innovate in the formulation of products and subsequent field trials.

To develop all these processes, we have a large multidisciplinary team and adapted facilities, with laboratory and pilot plant where to develop the tests.

Installations

We have a new high technology hydrolyzate plant with a production capacity of 20,000 liters per day as well as a laboratory equipped with all the machinery required to subject our products to the most exhaustive quality standards.

Hydrolyzed blood
Concentrated hydrolyzed blood
Hydrolyzed keratin

At **ABF** we are manufacturers of organic and organomineral high-quality fertilizers for horticulture, nursery, green spaces and agriculture in general.

We believe in natural process transformation and for this reason we offer highly technified, agronomically-tested and fully sustainable products.

Our four main strategic axes are: clients, processes, collaborators and products. All of them are directly related to our values of integrity, sustainability, humility and excellence.

Our challenge is continuous improvement, to be able to offer products in which respect for the environment and agronomic efficiency go hand in hand.

Ours products

With free amino acids that provide resistance to water stress factors, inclement weather, pests and diseases and a great implicit bio stimulant effect.

Hydrolyzed blood

Liquid organic fertilizer based on blood hydrolysate in formulation NPK 2-4-6 with iron and amino acids specially designed for stages of flowering and fruiting. With 100% absorbable natural iron.

Concentrated hydrolyzed blood

Liquid organic fertilizer based on concentrated blood hydrolysate in formulation NPK 4-6-9 with iron and amino acids specially designed for stages of flowering and fruiting. With 100% absorbable natural iron.

Hydrolyzed keratin

Liquid organic fertilizer based on concentrated keratin hydrolysate in NPK 9-2-3 formulation with amino acids, specially designed for stages of vegetative growth.

Certified product as an input for organic farming
